

AT A GLANCE

Agriculture and agri-processing is a fundamental element of socio-economic development in Africa - particularly in relation to rural communities, farming, food security and water management, housing and land conversion activities as urban areas expand. This is also linked to the socio-political dynamics of the region.

Tongaat Hulett is a proactive and resilient organisation working in collaboration with all its stakeholders in a focused, constructive, mutual value-adding and developmental manner. It is well-positioned to benefit, and be a key development partner, as agriculture and agri-processing in Sub-Saharan Africa develops from a low base.
